Craft Entrepreneurs

As a business owner you are often the one doing everything for your business, beyond the making (the fun part).... Until now.

Class: AI Assist your Craft Business

Specialized masterclass to help craft entrepreneurs automate various backend parts of their business.

One-on-One Tutoring

As a business owner myself (and for 2 other businesses) I can provide 1:1 guidance so AI can save you tons of time

WHY WORK WITH ME?

I'm a lifelong quilter, digital innovator, and educator who blends 30+ years of professional digital experience with decades of quilting tradition. I help guilds honor their heritage while embracing new tools with integrity and transparency.

My approach is warm, community-centered, and grounded in the belief that the heart of quilting is — and always will be — human.

–Deb Weidman

Request Pricing & Availability

I customize consulting packages based on your guild's size, needs, and goals.

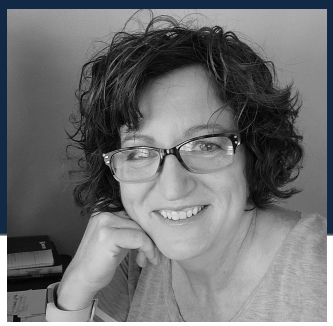

How is your guild currently talking about AI?
Have any members expressed concerns, fears, or strong opinions about AI?
Are you seeing AI-assisted quilts show up in your show entries or challenges?
Do you want your guild to embrace AI, limit it, or simply understand it better?

Are there administrative tasks that take the joy out of your business?
Gain new perspective for working smarter not harder!

AI for Quilts

PRACTICAL AI COURSES AND RESOURCES FOR QUILTERS, GUILDS AND CRAFT ENTREPRENEURS.

ABOUT DEB WEIDMAN

Deb Weidman is a lifelong quilter/crafter and digital innovator who bridges the gap between traditional craft and emerging technology. Her journey with fabric began in junior high, with 4-H sewing projects earning a spot at State Fair, followed by piecing her very first Log Cabin quilt in high school. Over the years, she has designed and created a variety of quilt projects, from cherished baby quilts to custom t-shirt memories.

Beyond the sewing studio, Deb holds a degree in Graphic Design and brings over 30+ years of professional design and digital expertise. After successfully running her own business and teaching classes for seven years, she transitioned into the corporate tech space, spending over nine years at VML, a leading global digital marketing agency, as Senior Web Project Manager. For the past two years, she has actively integrated cutting-edge AI tools into her work and realizing its efficiencies.

Through AI for Quilts, Deb blends her technical background, design eye, and deep love of quilting to empower makers. She teaches collage quilters how to use Artificial Intelligence not as a replacement for human creativity, but as a tireless, modern design assistant and tool that can assist in various parts of the design and creation process. Think of Deb as the "Bob Ross of Binary." AI is not replacing the creative thinking, color choices, cutting, piecing, sewing or quilting; Deb is offering quilters a "happy little shortcut" to the part they love most—the actual stitching/creating.

AUDIENCE TAKEAWAYS

- Understand AI tools in simple terms
- Save time on creativity and tedious tasks
- Generate new ideas and inspiration
- Build confidence in using AI
- Apply AI to your quilting process
- Develop your own AI policies
- Save time on business backend tasks
- Have more time for fun the fun parts
